Hello,

I am the Town Clerk for the Town of Brodnax, VA. I support all public bodies having electronic meeting authority. We have used the electronic meeting option for about a year now for our Town Council Meetings. We have had great success with it. We normally have a few members in person and a few members electronically. We feel that it works the same as if they are in person. We have a screen and projector with the electronic members on the screen, so that everyone in person can see them and hear them as if they are in the room with us. We also have a video camera set up and a speaker so that the members who are electronic can see and hear everything in our meeting room. It is very useful if someone is sick, out of town, or at risk of becoming sick and does not want to attend in person but they are able to still participate as if they are there. I fully support continuing the electronic meetings for our Town Council Members.

Thank you!

Beth Moore

Town Clerk
